Lumax Lighting is pleased to offer a selection of architecturally inspired luminaires for commercial and institutional interior spaces. Use these exciting styles as a complement to the space or for general illumination. With a variety of lumen packages, shapes, lengths, mounting and color options you are sure to have the flexibility to create the optimal lighting design.

LUMAX LIGHTING®

N2

Commercial & institutional uses in schools, offices, lobbies, entryways, coves, retail, hospitals and other healthcare facilities to provide light without the glare. The N2 Series is a modern lighting alternative to visually stimulate interior spaces. Install in continuous rows or individually.

- Custom extruded snap on diffuser offers high light transmission with excellent LED diffusion.
- Internal reflector is designed to create even illumination while improving overall efficiency.
- Precision fabricated steel housings are an economic alternative to extruded aluminum.
- Hemmed edges along length provides added rigidity and clean look.
